

Supply Chain Material

Overview

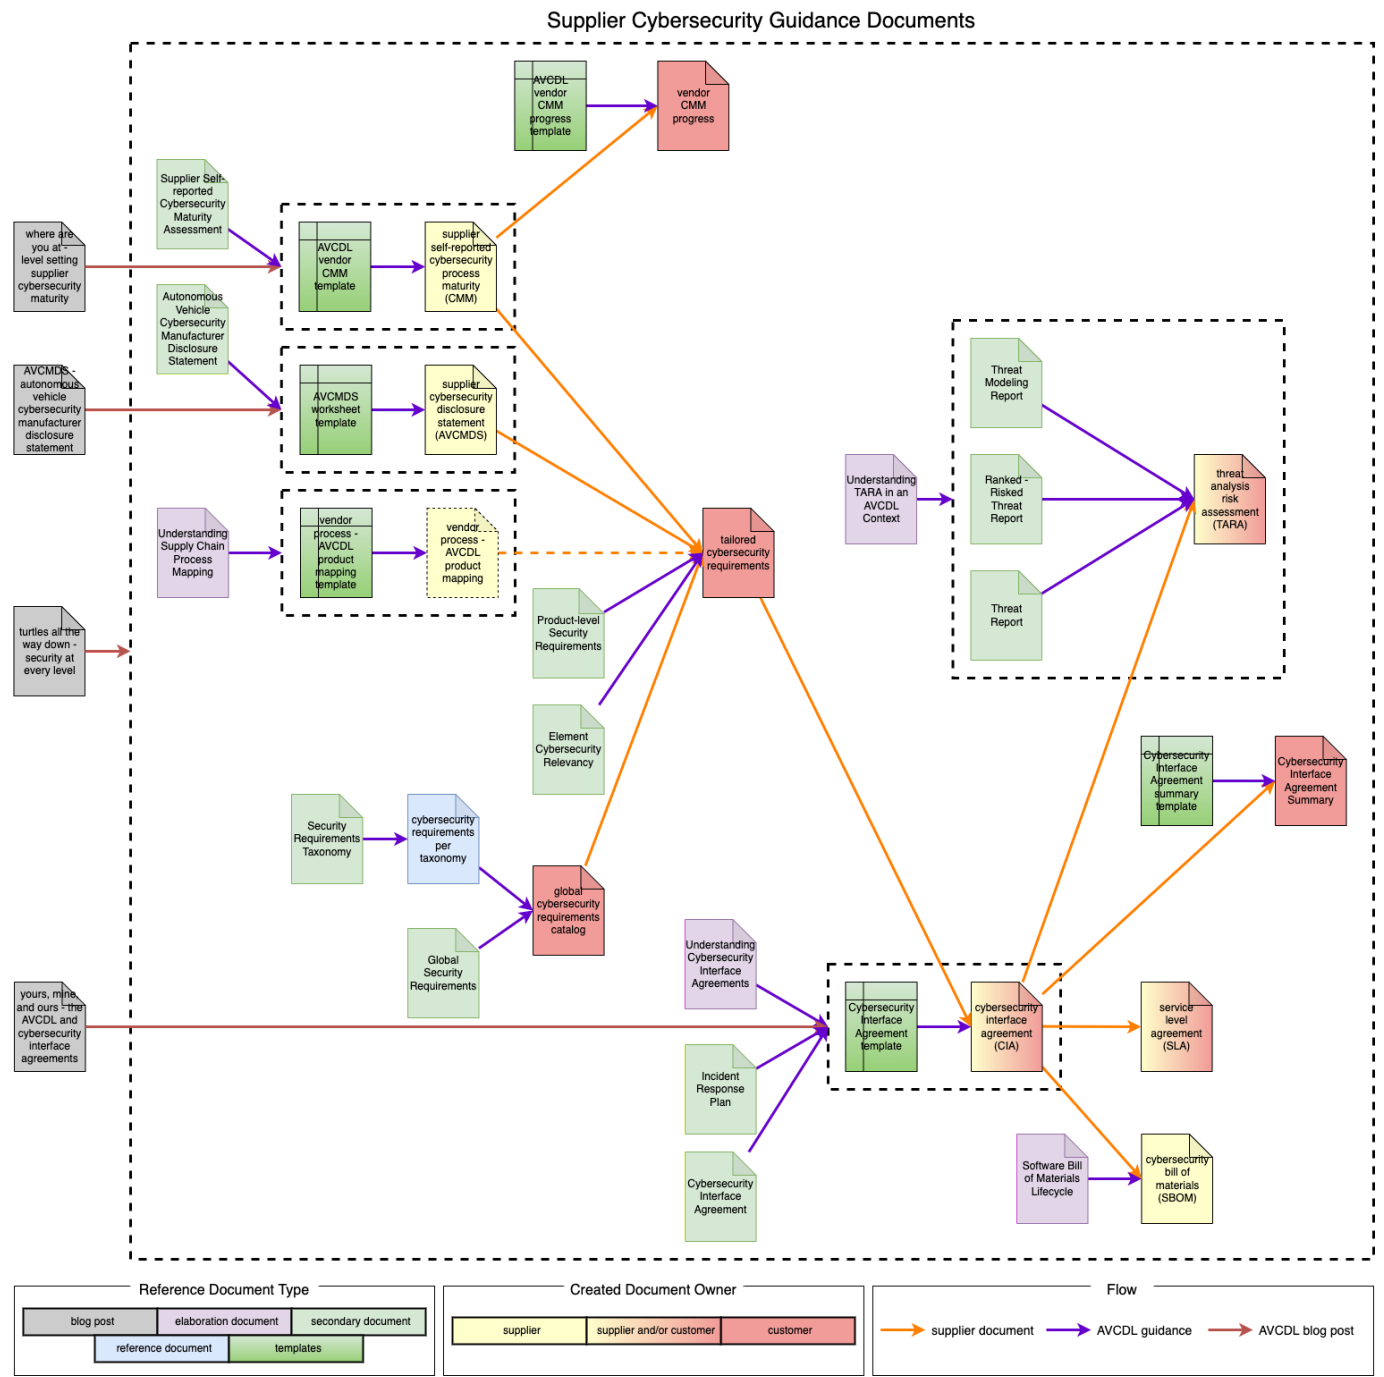

Cybersecurity within the supply chain is critical to the cybersecurity of the overall product. This page provides links to the supplier chain-specific **AVCDL** documentation.

Supplier-related Training Videos

A set of training videos complementing the written AVCDL supply chain documents. A list of the available videos can be found [here](#).

Guidance Documents

The following diagram illustrates the relationship between the various supply chain-related documents within the **AVCDL**.

The following are some general supply chain-related materials.

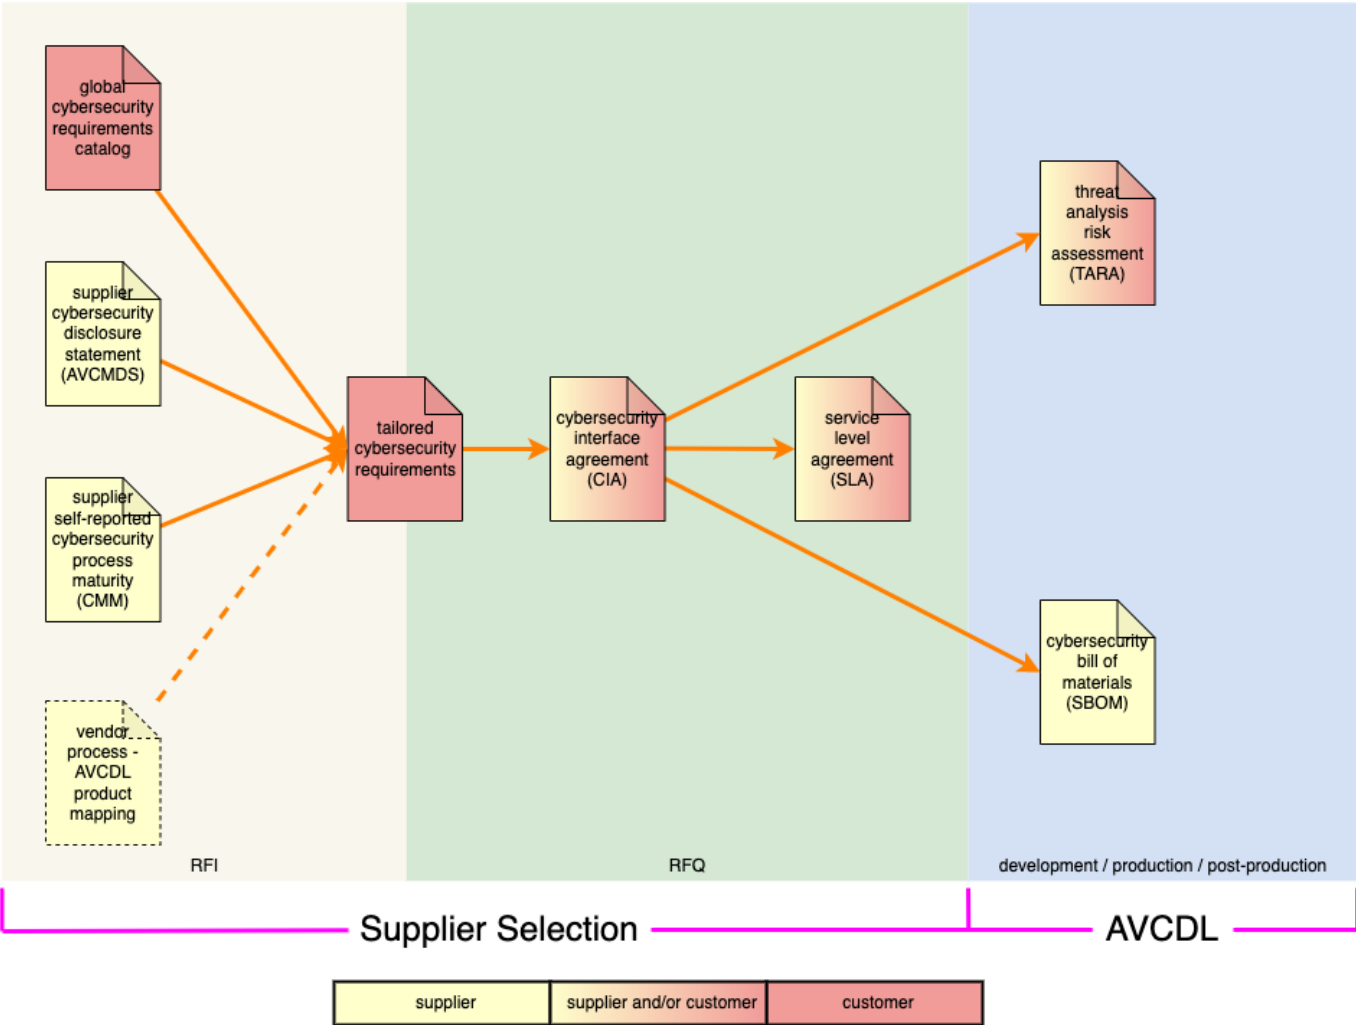

Supply Chain Overview

This is an overview of how supply chain cybersecurity is addressed within the **AVCDL**.

Supplier Selection Documents

The following diagram illustrates the relationship between the various supplier selection-related documents within the **AVCDL**.

Note that the diagram is broken into three phases:

- request for information (RFI)
- request for quote (RFQ)
- development / production / post-production

The following sections address the two phases specific to supplier selection.

Request For Information (RFI)

During the RFI phase, the supplier is asked to provide information used to determine their cybersecurity maturity and implemented processes.

Supplier Cybersecurity Disclosure Statement (AVCMDS)

This material covers how to complete the supplier cybersecurity manufacturer disclosure statement.

Video	supplier maturity	link

Vendor Process - AVCDL Product Mapping

This material covers how to map established supplier cybersecurity processes to their **AVCDL** counterparts.

Guidance	Understanding Supplier Cybersecurity Process Mapping	link
Template	vendor process - AVCDL product mapping template.xlsx	link
Video	vendor process mapping	link

Request For Quote (RFQ)

During the RFQ phase, the supplier and customer establish the responsibilities in the creation, deployment, operation, and decommissioning of the product the supplier provides.

Cybersecurity Interface Agreement (CIA)
